GENERAL INFORMATION

- **Project name:** Kindergarten no 16 in Gdynia, Poland
- **Owner:** Municipality of Gdynia (cooperation with the Municipality with the project)
- **Short description:** Demonstration building is a two-storey kindergarten building no 16, attended by around 130 children. It was constructed in year 1965 and it has the function of kindergarten from the beginning. Building volume is 2712 m³ and built up area is 464 m². The external walls are made from the brick with no insulation layer.
- **Status at the beginning :** No electronical documentation and design, building not retrofitted.

P2EDNURE APPROACH

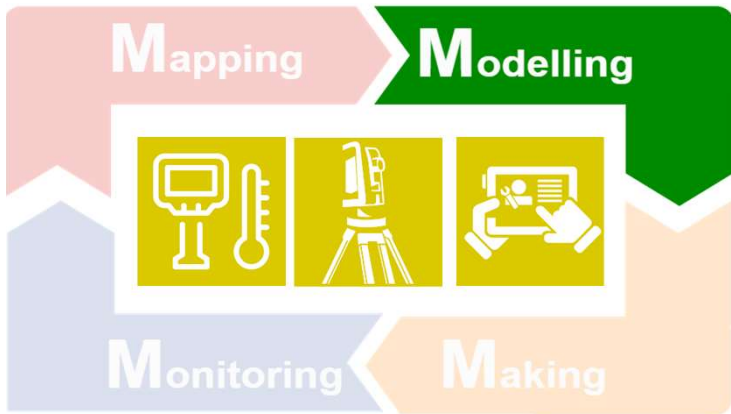

Mapping:

- Energy audit & building assessment condition
- 3D scanning
- Monitoring IAQ (temperature, humidity, CO2, PM1, PM2.5, PM10)

Modelling:

- Cloud to BIM
- As-built BIM model

Modelling:

- **BEM model and Energy analysis to select the most optimum renovation scenario**
- **65% of primary Energy savings**

Modelling:

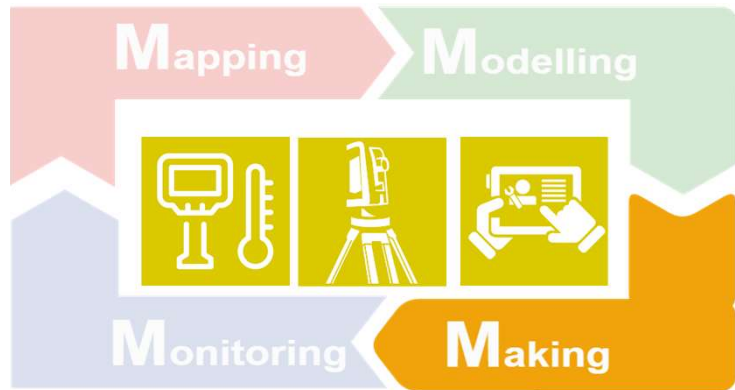

- Selection of PnP Fermacell multifunctional facade panels developed with the project
- BIM renovation design

Making:

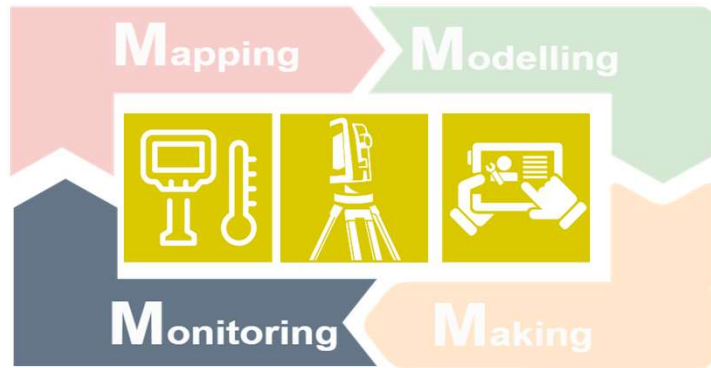

BEFORE

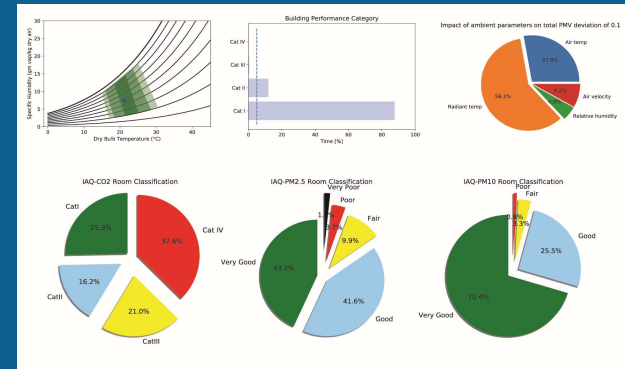

AFTER

Monitoring:

- Post renovation monitoring (temperature, humidity, CO2, PM1, PM2.5, PM10)

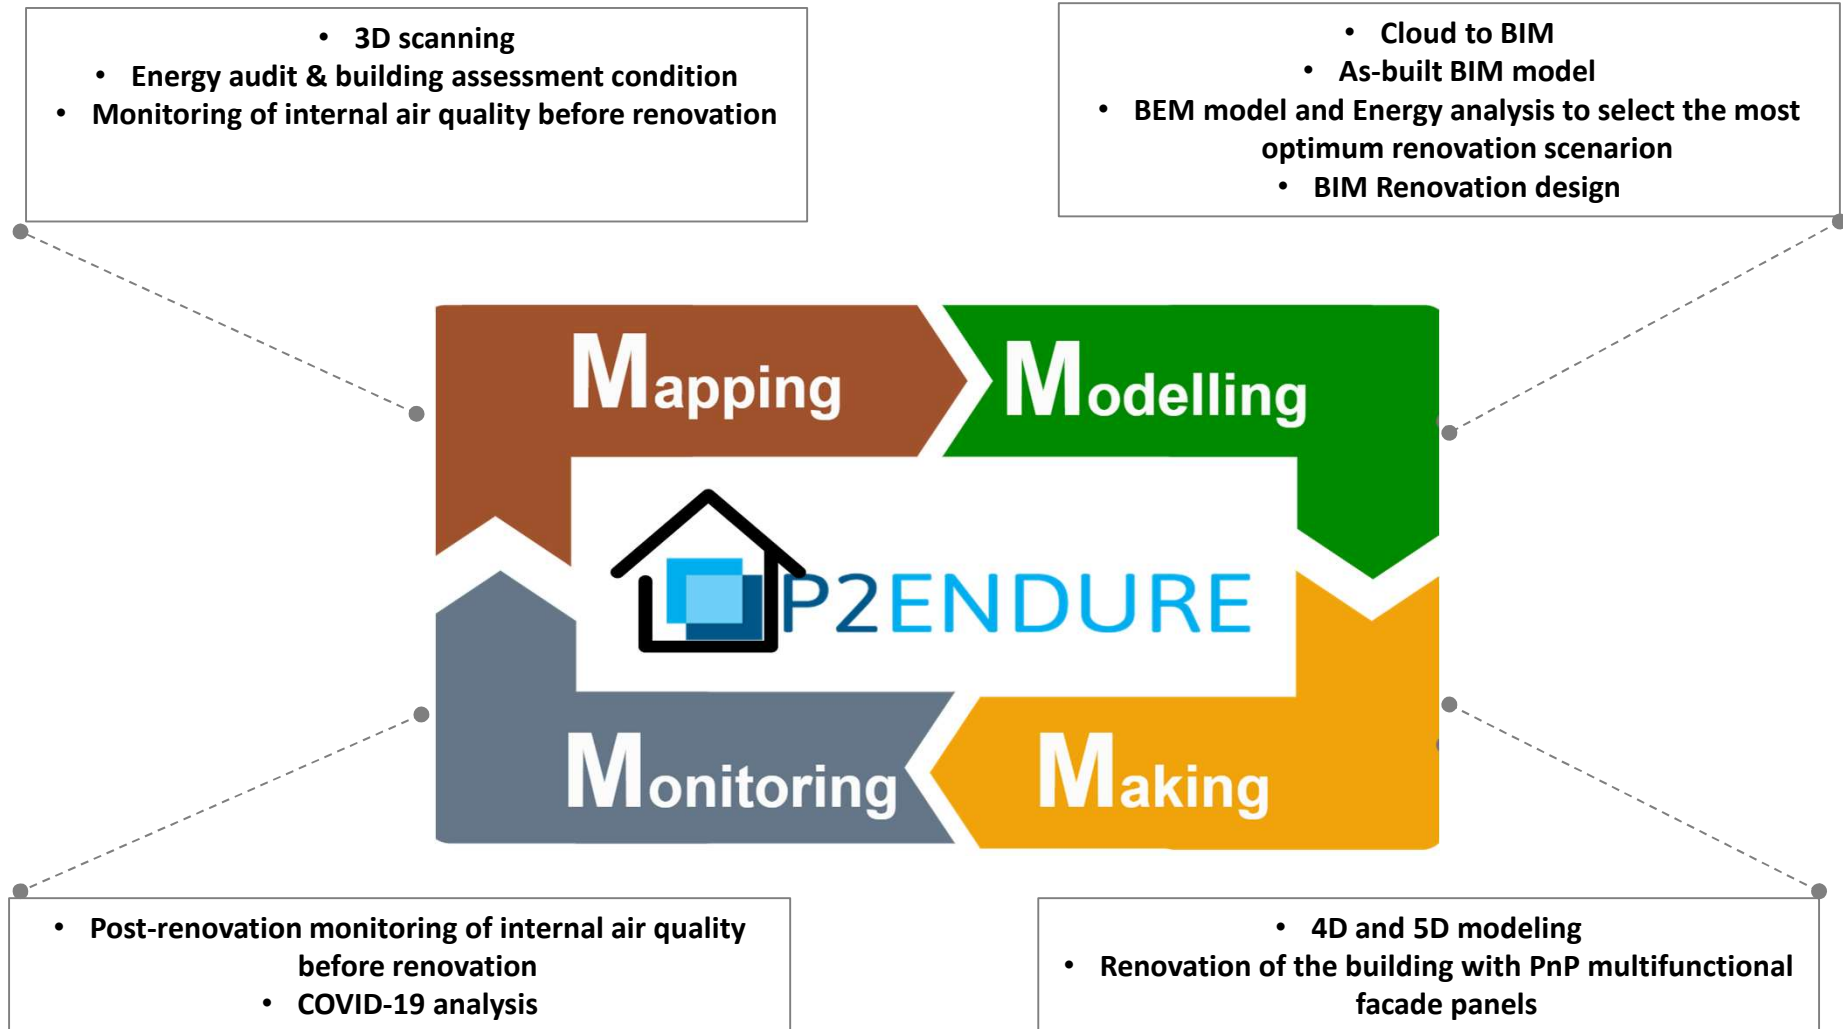

Monitoring:

- **Additional activity: COVID-19 analysis**
- Use of Open BIM-COVID 19 software to analyze the correctness of the applied solutions and procedures against the COVID-19 for the kindergarten
- Verification of : maximum number of people in the rooms, safe distance between people, distance between workstations and main routes attended by employees, children and parents, and the marking and location of disinfection stations.
